TIMBER HARVEST CHECKLIST

The following information **MUST** be submitted along with a complete Timber Harvest Application:

Logging Plan:

- ☐ Design, construction, maintenance, and retirement of access system
- ☐ Estimate and location of total number of mature trees in the plot
- ☐ Total number of and location of trees to be cut
- ☐ Design, construction, and maintenance of stream and wetland crossing
- ☐ Soils engineer's certification as required

Map:

- ☐ Site location and boundaries of plot and logging areas
- ☐ Significant topographic features related to environmental problems
- ☐ Floodways and floodplains
- ☐ All landslide prone soils and slopes exceeding 25%
- ☐ Location of all earth disturbance activities such as roads, landings, water control measures, and structures
- ☐ Locations of all stream crossings
- ☐ Location of the proposed operations to municipal, county, and state highways including access to and weight limits of those highways
- ☐ Stream crossing and wetlands protections
- ☐ Stormwater management plans

Applications will not be accepted or considered until all required materials are received by the Town.
